

CVVX 125-RAL9016

Kombinovaná žaluzie, bílá

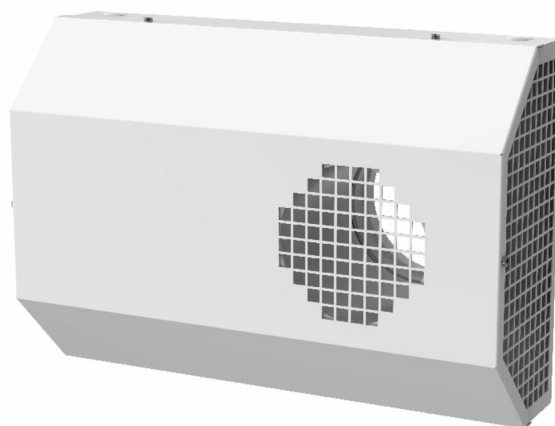

Číslo výrobku: [26422](#)

Varianta: Výchozí

The Combi-Grid is manufactured in white (RAL9016) powder-coated galvanized sheet steel. Suitable for mounting on outside walls. The outside-air intake and exhaust-air are separated from each other so that the air cannot 'short circuit'.

Mounting

4 screws on the front facilitate mounting and removing for cleaning. The grid has a back plate which is first screwed and fitted to the wall. The grid can be mounted with the exhaust-air outlet either on the right or the left.
